Virginia Tech Precision Agriculture Day
Oct. 12, 2016, 9 a.m. – 4:30 p.m.
Kentland Farm
5250 Whitethorne Road, Blacksburg, VA 24060

Join us at the first Virginia Tech Precision Agriculture Day where you can learn about precision agriculture technology and how you can use existing and future technology on your farms.

Topics covered include

• Low-cost technologies that are available now and are practical for your operation.
• Technologies that work on smaller farms.
• Precision agriculture equipment for use on hilly terrain.
• Recommendations for producers who are just beginning to consider a technology investment.
• Return on investment from precision agriculture.

Features

• Drone demonstrations by Virginia Tech’s Department of Mechanical Engineering.
• Featured demonstrations and presentations will be provided by Hoober Inc. of Ashland, Virginia, James River Equipment of Tappahannock, Virginia, Meade Tractor of Christiansburg, Virginia, and Southern States Cooperative.

Sponsored by the Virginia Tech College of Agriculture and Life Sciences and Virginia Cooperative Extension. A special thanks to Farm Credit of the Virginias for providing water and refreshments. Space will be limited to the first 250 people who register.

If you are an individual with a disability and desire an accommodation, please contact Morgan Paulette at 540-980-7761 or paulette@vt.edu during regular business hours at least 10 business days prior to the event.
